

# EXAMPLE CVI Participant Safety Assessment Form

**About this form.** This safety assessment was developed for programming based on the READI Chicago model and has been used in replications such as Pushing Progress Philly (P3) in Philadelphia. Outreach staff complete the form before a participant begins traveling to a new job-training site. It is designed to identify potential safety concerns, such as conflicts, unsafe travel routes, or risks associated with the site, and determine whether additional planning or supports are needed before programming begins.

*Complete all applicable items. Use additional pages when more space is needed.*
